Bring the four core smṛtis into the index

Kane's footnotes that quote Manu, Yājñavalkya, Āpastamba and Gautama start showing where their verse stands, on every page of the History of Dharmaśāstra that cites them.

of Kane's footnotes located

611 today → **1,461**

The four smṛtis account for up to 850 more.

▼ **How the price is made up**

- A vidvān for 4 months, choosing the editions and checking every match: ₹4 lakh
- 1 engineer-month to source, structure and index the four texts: ₹0.6 lakh

Kane's History of Dharmaśāstra, with 611 footnotes already located ↗

₹4.5 lakh 4 months

पुराणनामकोशः

Index the names of the Harivaṃśa: the Nāma-Kośa pilot

The first index of names for any Purāṇic text: every person, people and place in the Harivaṃśa, verified by scholars and tied to the verse. It is the pilot for the eighteen Mahāpurāṇas. Its names are what the Purāṇa atlases need: today none of them can open a card for a person or place, as the Virāṭa Parva's can.

Harivaṃśa verses with their names indexed

0 today → **16,100**

Up to 4,034 headwords. No Purāṇa has such an index today.

▼ **How the price is made up**

- 1 senior vidvān, 10 hours a month for 9 months, at ₹5,000 an hour: ₹4.5 lakh
- 5 junior vidvāns, 25 hours a month each for 9 months, at ₹2,500 an hour: ₹28.12 lakh
- 2 pāṭhaśālā students, 40 hours a month each for 9 months, at ₹400 an hour: ₹2.88 lakh
- 3 engineer-months for the reading tool and review queue: ₹1.8 lakh
- The team is the full Nāma-Kośa's, scaled to the pilot's pace of about 1,800 verses a month.

The Mahābhārata's 13,772 named entities, from Sorensen's index ↗

₹37.5 lakh 9 months

पुराणनामकोशः

The Purāṇa Nāma-Kośa: an index of names for all eighteen Mahāpurāṇas

Every person, people, dynasty and place across the eighteen Mahāpurāṇas, verified by scholars and tied to the verse, so a scholar can ask where Ambarīṣa appears, or which Purāṇas know a tīrtha, and get an answer. Released one Purāṇa at a time, after the Harivaṃśa pilot above has measured the real cost. Each Purāṇa indexed fills the empty name cards of its atlas, so a verse heard in an upanyāsam leads to everyone it names.

Mahāpurāṇa verses with their names indexed

0 today → **351,225**

No index of names exists for any of them. About ₹20.53 lakh per 10,000 verses, so a single Purāṇa can be sponsored on its own.

▼ **How the price is made up**

- 5 senior vidvāns, 10 hours a month each for 3 years, at ₹5,000 an hour: ₹90 lakh
- 25 junior vidvāns, 25 hours a month each for 3 years, at ₹2,500 an hour: ₹5.625 crore
- 10 pāṭhaśālā students, 40 hours a month each for 3 years, at ₹400 an hour: ₹57.6 lakh
- Half an engineer for 3 years to run the reading tool and publish each Purāṇa: ₹10.8 lakh
- The Harivaṃśa pilot will measure the real pace, and the team will be set from it.

पुराणश्रवणकोशः

Commission a whole Purāṇa as an upanyāsa, addressable from the first day

A senior upanyāsakar expounds a whole Purāṇa over about a year, recorded so that every verse can be played at its own address. Priced here for a Purāṇa of average length, about 19,500 verses; a longer or shorter one scales with it, at about ₹1.87 lakh for every 1,000 verses. We begin with one adhyāya to prove the method.

Purāṇa verses you can hear at their own address **8,391** today → **22,991**

About 14,600 more, if three verses in four are reached, as in the Virāṭa Parva.

▼ **How the price is made up**

- The hours come from our own series: the Kārtika Māhātmya's 1,817 verses took 25 hours of upanyāsa and the Virāṭa Parva's 2,262 took 30, about 74 verses an hour. So about 264 hours for the whole Purāṇa.
- Honorarium to the upanyāsakar, about 264 hours at ₹5,000 an hour: ₹13.2 lakh (the trust sets this figure)
- Recording, about 264 hours at ₹2,000 an hour: ₹5.28 lakh
- Turning it into a verse-addressable edition, 264 hours at ₹49: ₹0.13 lakh (measured)
- Junior vidvāns checking every verse by ear, about 528 hours (twice the recording) at ₹2,500 an hour: ₹13.2 lakh
- Senior vidvāns settling what the juniors are unsure of, about 26 hours at ₹5,000 an hour: ₹1.3 lakh
- 6 engineer-months to build and publish the atlas as the series goes: ₹3.6 lakh

तैत्तिरीयब्राह्मणम् · तैत्तिरीयारण्यकम्

Record the Taittirīya Brāhmaṇa and Āraṇyaka, with the text following the chant

The Brāhmaṇa and the Āraṇyaka are already on the Yajurveda site with their svaras, but no one can hear them there. Vidvāns record both, and every word is aligned to the recording, as the Saṃhitā's are, so the text follows the chant.

hours of Kṛṣṇa Yajurveda chant with the text following word by word **61.5** today → **120.5**

About 59 hours: 43 for the Brāhmaṇa and 16 for the Āraṇyaka. This is estimated from the length of their text against the Saṃhitā's, and the recording will measure it.

▼ **How the price is made up**

- Honorarium for the vidvāns, about 59 hours at ₹5,000 an hour: ₹2.95 lakh (the trust sets this figure)
- Recording, about 59 hours at ₹2,000 an hour: ₹1.18 lakh
- A vidvān for 2 months, checking the alignment by ear: ₹2 lakh
- 1 engineer-month to align every word to the recording and publish it: ₹0.6 lakh
- The text with svaras is already prepared, so nothing is charged for it.

The Saṃhitā today: the text follows the chant word by word (beta) ↗

₹6.5 lakh 6 months

ग्रन्थदानम्

Publish one out-of-print smṛti commentary

A rare printed commentary is transcribed, indexed by its own contents, cross-linked to Kane and the index, and published free. Priced per thousand printed pages.

dharmaśāstra volumes transcribed and online **7** today → **8**

The Smṛtimuktāphalam's seven volumes are the precedent. They are online in beta, still being proofread.

▼ **How the price is made up**

- OCR of 1,000 pages, Sanskrit with a regional language: ₹5,000
- A junior scholar for 5 months, proofreading about 200 pages a month: ₹3.75 lakh
- A vidvān for 1 month, reviewing the proofread text: ₹1 lakh
- 1 engineer-month to index, cross-link and publish: ₹0.6 lakh

₹5.5 lakh 6 months

सायणभाष्यम् · भट्टभास्करभाष्यम्

Clean up and publish the Yajurveda bhāṣyas

Sāyaṇa's and Bhaṭṭa Bhāskara's commentaries on the Taittirīya Saṃhitā are beside the text for kāṇḍas 1, 2, 3 and 6. For kāṇḍas 4, 5 and 7 they exist as typed files with gaps, and Bhaṭṭa Bhāskara on the Brāhmaṇa and Āraṇyaka exists only as scanned pages. Each is proofread, checked by a scholar, tied to its anuvāka and published beside the text.

Saṃhitā anuvākas with both bhāṣyas beside the text — **320** today → **651**

Then Bhaṭṭa Bhāskara on the Brāhmaṇa and Āraṇyaka: 2,611 scanned pages, none on the site yet.

▼ **How the price is made up**

- OCR of 2,611 scanned pages of Bhaṭṭa Bhāskara: ₹0.13 lakh
- Two junior scholars for 8 months, proofreading about 3,200 pages at 200 pages a month each: ₹12 lakh. A source for Sāyaṇa on kāṇḍas 5 and 7 still has to be found.
- A vidvān for 9 months, reviewing both bhāṣyas: ₹9 lakh
- 3 engineer-months to structure each bhāṣya by anuvāka, tie it to the text and publish: ₹1.8 lakh

Both bhāṣyas beside the Saṃhitā, kāṇḍas 1, 2, 3 and 6 (beta) ↗

₹23 lakh 9 months

वेदाभ्यासः

Vedic Abhyāsa: a chanting tutor for pāṭhaśālās

Śrī Rudram and Chamakam in all four pāṭhas, with the app telling a student which svaras went high or low against the ācārya. Released on Android and iPhone and piloted in pāṭhaśālās across three states.

pāṭhaśālās using it — **0** today → **100**

First it must pass our planted-error test: catch known mistakes in a recorded line.

▼ How the price is made up

- 1 engineer for 12 months: ₹7.2 lakh
- The ācārya's recordings of saṃhitā, krama and jaṭā: ₹2 lakh
- Pilot coordination and devices for pāṭhaśālās: ₹5 lakh

Svarānugamī on the Yajurveda: the text follows the chant word by word ↗

₹14 lakh 12 months

Or carry the team for a year

Vidvāns, junior scholars, engineering and hosting for twelve months, spent on the results above in the order the trust sets, so the work does not wait for each line to be funded.

▼ How the price is made up

- A vidvān for 12 months, across the projects: ₹12 lakh
- Two junior scholars for 12 months, across the projects: ₹18 lakh
- 2 engineers for 12 months: ₹14.4 lakh
- Hosting and audio storage: ₹2 lakh

₹46.5 lakh a year

HOW WE THANK YOU

Your name stays off the verse, and one click away from it

The texts belong to the tradition, so no sponsor's name is printed on a verse, a chapter or a recording. Each result you fund instead carries one small link to the sponsors' page, where you are thanked by name.

On every page you funded

A single line at the foot of the chapter or text:

```
This edition was sponsored · see sponsors
```

On the sponsors' page

Your name, what you funded, when, and links to each result. Anonymous if you prefer.

In the meter

The figure on this page moves as the work is done, and it is printed by the sites themselves. You can check progress without asking us.

WHY YOU CAN TRUST THE PRICES

One figure is measured; the rest use these rates

Turning a recording into an edition you can play verse by verse costs ₹49 an hour of audio. That is measured on 93 hours of real recordings, not estimated. Almost all of the cost of this work is people, and the trust began on the premise that the vidvāns and scholars are honoured for their work. Vidvāns and scholars who carry a project are retained by the month; senior vidvāns consulted on a project are paid by the hour; students do much of the reading. We priced every line with these rates, at the top of each range.

- **Vidvān retained by the month**: ₹75,000 to ₹1 lakh a month, priced at ₹1 lakh
- **Junior scholar retained by the month**: ₹40,000 to ₹75,000 a month, priced at ₹75,000
- **Senior vidvān, consulted by the hour**: ₹5,000 an hour
- **Junior vidvān, by the hour**: ₹2,500 an hour
- **Pāṭhaśālā student**: ₹400 an hour
- **Vidvāns reciting for a recording**: ₹5,000 an hour of recitation

Engineer: ₹60,000 a month

Turning recorded audio into a verse-addressable edition: ₹49 an hour of audio (measured)

Scholars and vidvāns are retained by the month, at the top of each range. Each line shows what it is based on. Last updated 2026-10-15.

WHAT WE HAVE ALREADY BUILT

Nine sites you can open today

Seven of them are public betas, still going through verification and cleanup; they are marked below. The full tour, with screenshots and the thinking behind each, is in the Sanatana Sampatti pitch.
